HYFAB MAKEUP ASSEMBLIES

HYFAB Makeup Assemblies (MUA's)

The design and installation of water make-up is critical to a closed-loop hydronic heating or cooling system. Incorrect pressurization may result in unwanted air which not only decreases comfort and efficiency but can also shorten the life of your system.

Contact us for more information on the HYFAB MUA.

HYFAB Makeup Assemblies (MUA's)

HYFAB Make-up Assemblies are pre-engineered and factory built to ensure the makeup components are correctly assembled. These assemblies save time and money by reducing field labor costs.

Advantages

- Reduces field labor cost by eliminating fabrication time
- Pre-engineered for proper operation
- Single source purchasing for all components
- In stock for quick shipment
- Compact design
- PT port for checking incoming pressure
- Valve placement allows for PRV adjustment when filling system
- Dielectric nipple to prevent galvanic corrosion

Item Number

MUAXXX -	X -	XXX -	XXX -	X*
Make-up Assembly Size (Inch)	PRV Pressure Range (PSI)	Relief Valve Size (Inch)	Relief Valve Setting (PSI)	Backflow Preventer
075 - 3/4"	L - 10 to 25 H - 25 to 60	075 - 3/4"	030 036 045 050 075 100 125	N - None R - RPZ with Air Gap D - Double Check
100 - 1"	N - 15 - 75	100 - 1"		

*Add MI to end of model for ball valves made in Italy. Only available with 3/4" size.

Order the below for field installed incoming pressure gauge:
 (1) 5083 AB Ball Valve
 (1) PLF2598L-08 Gauge, 0-300 PSI (other ranges available)

Contact us for information on how to save money with prefab MUA's.
